Join national award winning artist, Barbara Coleman, for a three day workshop in stunning Jemez Springs, NM. Taking place before the PAPNM 2019 Jemez Springs Paintout & Show, Barbara will cover topics to strengthen your skills in capturing beauty and design from the landscape. This workshop will hone your ability to design compositions, observe color, and create value relationships, which are essential to making compelling paintings.

#### Workshop Will Include:

- Learning to see the five types of light (identified by the artist John Singer Sargent) to capture form through light and shadow. You will understand which type of light you are painting in, allowing you to see color and value relationships more accurately.
- "Color gets all the credit and Value does all the work." Learn to see, design and create strong value plans to strengthen your composition.
- Color gets its due credit! Learn to see values within color, and paint beautiful color according to your value plans.

These concepts will be taught through daily lecture and demonstrations. Students will be given a series of exercises to see and practice these ideas. We will meet at Jemez Fine Art Gallery, 17346 Hwy. 4, Jemez Springs, NM each morning to begin our adventures.

"Raking Light at Ghost Ranch", 18"x 24", oil, Barbara Coleman
